

Features

- Sophisticated probabilistic matching algorithm
 - Years of field testing on large medical databases
 - Ability to tune matching to demographic characteristics of a population
 - Tracks matching algorithm version and quality of the match
 - Link and unlink to correct errors
 - Implements IHE, HITSP, HL7 and OMG standards, with interfaces for
 - IHE PIX-PDQ, including Pediatric Demographics Option, via HL7 MLLP
 - OMG EIS via SOAP WSDL
 - HITSP TP22 transaction package, and T23 transaction
 - Configurable interfaces for flat files, and delimited text files via various interfaces, including
-
- email
 - ftp drop boxes
 - batch files
 - SOAP
 - REST
